

The necessity to continuously improve the standard of the retraded tyre quality, makes very important to keep a constant technological development of the equipment used by the retraders. MGT design, manufacture and markets their products worldwide, CNC machining centers and stand alone machines for retreading and new tyre industry. The constant use of new technologies, tested in other advanced fields, is the basis of MGT philosophy in designing their products.

Tyres Equipment

MGT One 63" Peeling Buffing Grooving Machine for OTR from 26.5 R 25 up to 55/90 R 63 (including 70/70 R 57).

Technical features

- NEW and reinforced exclusive inclined tyre holding frame design for easy loading/unloading the tire by overhead crane or forklift (not offered)
- high resistance linear way and linear bearing
- tyre holding group with bead plates (low pressure inflation), with hydraulic bead-plates opening/closing by ISO 9000 hydraulic cylinders
- exclusive tooling frame (3 positions Peeling/Buffing/Grooving) working with 5 axis
- 6 inches peeling gauge (new design with rotating tool)
- Rockwell Allen Bradley Control Logix Plc and Kinetic 6000 Cnc, brushless motors and tyre rotation (made in USA)
- MGT PC with 15" LCD Touch Screen for cycle control and remote assistance with webcam connection
- front manual buffing arm with platform
- tyre lifting device
- open software developed on Rockwell Allen Bradley Ladder language.
