

Corporate Materials Management: An Unseen Yet Persistent Challenge

PPE, TOOLS, AND CONSUMABLES: WHAT IS
THE COST OF INEFFICIENCIES AND WASTE?

The Concealed Inefficiencies That Hinder Your Business

30%

Thirty percent of machine downtime is attributed to the unavailability or errors related to consumables.

25%

Operators experience a loss of up to 25% of production time as a result of manual searches for personal protective equipment or tools.

10%

Approximately 10% of companies face challenges associated with legal obligations concerning workplace safety.

60%

As much as 60% of the budget allocated for personal protective equipment and tools is squandered due to insufficient control and optimization of usage.

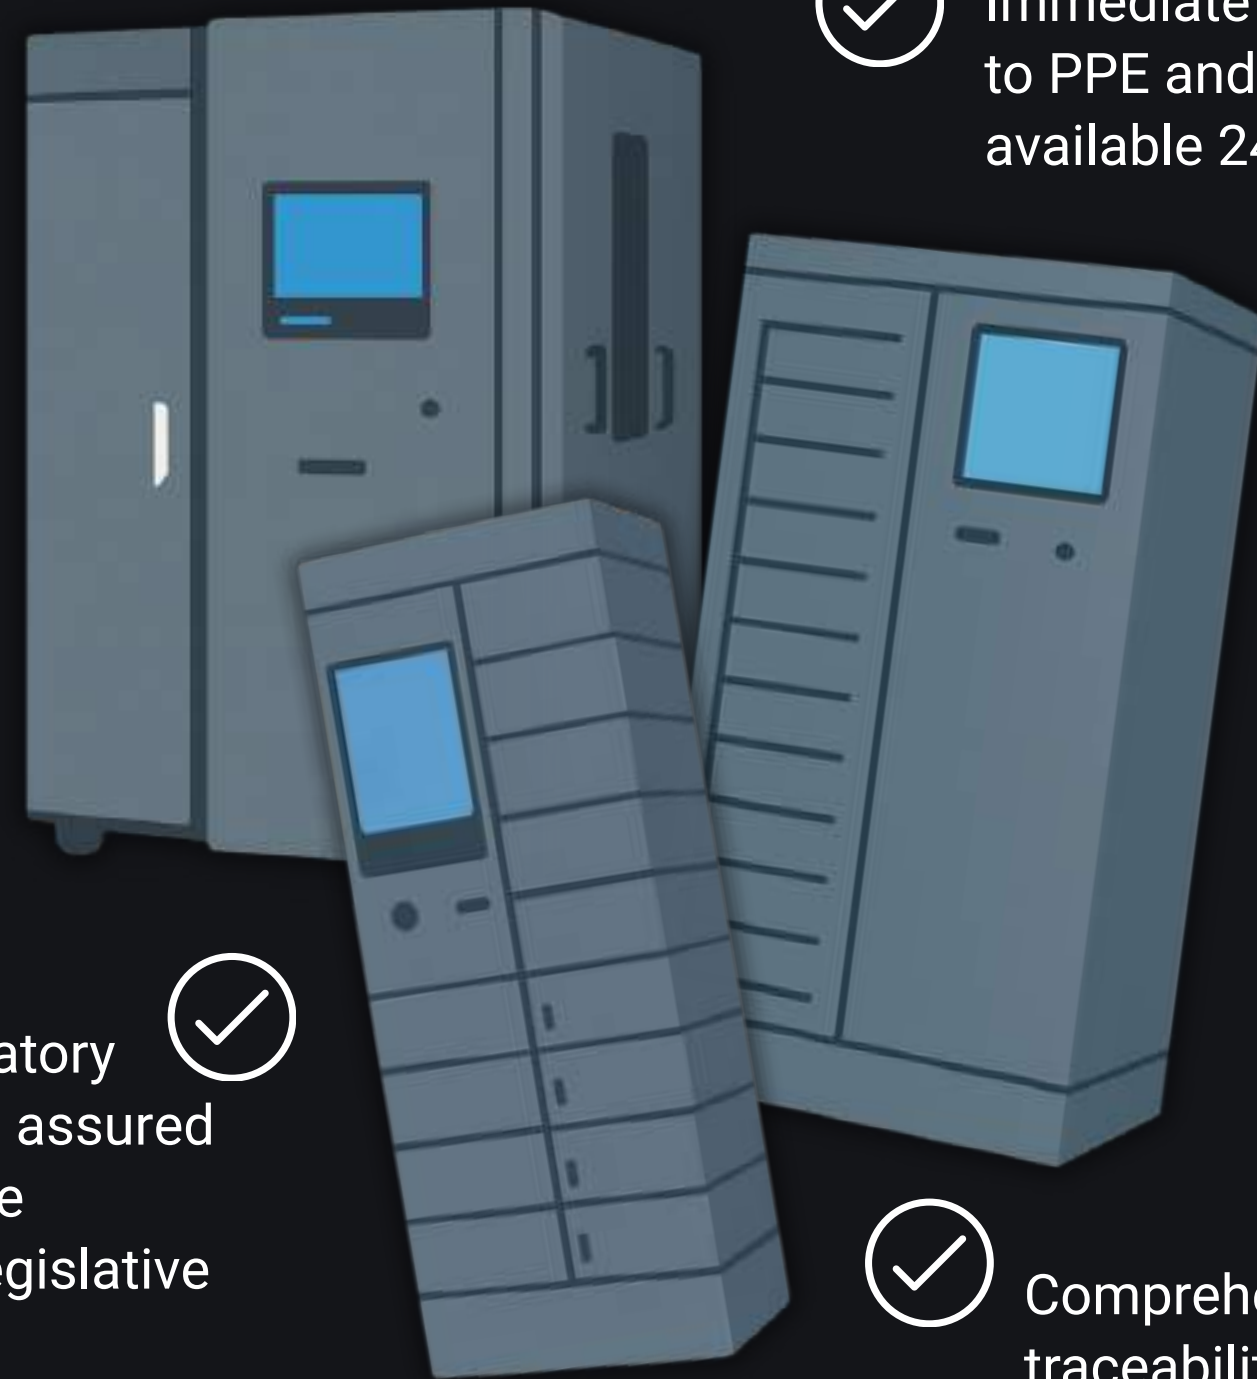

The resolution? Automated, secure, and efficient management.

✓
Conserving human
resources,

operation.

MGT Italia: Technology and innovation serving your enterprise.

- Experts in the strategic management of PPE, tools, and consumables.
- Tailored solutions for every type of organization and industry.
- Proprietary technology that is easy to integrate and utilize.
- Comprehensive support: from preliminary research to operational oversight.

Analysis of company typology and internal processes.

Analysis of the floor plan and delineation of the optimal layout to enhance efficiency.

Consumption analysis for PPE, sizing calculations, and recharging frequency assessment.

Concrete outcomes, each day

1

Minimization of errors and lead times.

2

Dependable data for swift analysis and decision-making.

3

Prompt and regulated access to resources.

4

Improved warehouse organization and minimization of obsolete inventory.

MGT Technology: Streamlined Management, Tangible Outcomes

1

I24Manager:

Data management
software, regulations, and
usage policies.

2

Dedicated hardware:

Vending machines
engineered for capacity,
modularity, and scalability.

3

Comprehensive support:

Technical assistance for
software and hardware.

i24Manager: complete control at your fingertips

Understock analysis and reporting

Regular monitoring of expenses and usage

Management of loading and picking operations
by the operator

Analysis across various levels of aggregation:
Batch management, date and expiration
management, picking regulations, purchase
request generation (PUR), etc.

MGT Automated Warehousing Solutions: modularity and efficiency

Tailored capacity to meet every storage requirement.

Modularity: adaptable configurations of drawers, lockers, spirals, and vertical systems.

Scalability: Solutions that adjust to the company's expansion.

Engineered for user-friendliness and optimal reliability.
